OBJECTIVE

Software Developer with 1 year of experience in building web applications using React JS and Next JS. A determined worker who seeks to learn and grow consistently

EXPERIENCE

July - June

- **Software Developer**
  Solidity Technologies
  - Led the successful integration of multiple APIs allowing seamless data transfer into the Fourdoor website, an online platform that provides car service. Collaborated with backend developer and designer. Live link (https://www.fourdoor.com)
  - Developed a High quality website from scratch using Next JS for an educational app, that provides ultrasound courses in India.
  - Created a fashion e-commerce and social website, made reusable UI components based on custom design specifications with optimized coding efficiency.

EDUCATION

2023

- **Lovely Professional University**
  B-Tech in Electronics and Communication
  7.95

2019

- **Greenfields Public School**
  Class XII
  71

2017

- **Greenfields Public School**
  Class X
  9.2

SKILLS

- HTML
- CSS and Tailwind CSS
- JavaScript and TypeScript
- React JS, Next JS and Redux Toolkit
- Git

PROJECTS

- **Food Ordering App (Live link - https://foddiiee.netlify.app)**
  Developed a dynamic food delivery app using React, Redux and Tailwind CSS, applying hooks and react routing to streamline the ordering process and enhance user experience. Implemented cart functionality with Redux Toolkit.
- **Movie Browsing App (Live link - https://my-flix-gpt.netlify.app)**
  Created a Netflix clone with Gpt integration that provides users with a familiar interface to browse movies. Integrated seamless authentication by using firebase, added multi language support, TMDB API integration for a vast movie collection and added OpenAI GPT search functionality for intelligent movie search.
